Camel

The color is a warm, rich tan with golden undertones, making it a versatile option that pairs well with various shirt and accessory choices. It's a neutral yet distinctive color that stands out without being overpowering, offering a refined alternative to the classic navy or black suit.

NAVY TRENDS

Navy works year-round. It's deep enough to look sophisticated during the cooler months but also light enough to be worn in warmer weather. Navy also pairs perfectly with tons of tie color options
